Civil Engineering Database Subject Heading Index

The **Civil Engineering Database (CEDB)** is designed to provide free, easy bibliographic access to all ASCE publications. The database covers ASCE documents published since 1970. It provides access to all the journals, conference proceedings, books, standards, manuals, magazines, and newspapers. The index terms below were assigned to papers published in this journal during 2003 from a CEDB subject heading list. The CEDB and subject heading list can be accessed on the Web at *http://www.pubs.asce.org/cedbsrch.html*.

Aerial photography

Geographic Information System Data for Supporting Feature Extraction from High-Resolution Aerial and Satellite Images. —Guennadi Guienko and Yerach Doytsher; 129(4), 158-64 (2003).

Algorithms

Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. —Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).

Canada

How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? —Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).

Case reports

Variance Component Estimation and Precise GPS Positioning: Case Study. —Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).

Coal mines

Correlation Survey for Shaft Deepening in Digwadih Underground Coal Mine. —P. P. Bahuguna; 129(1), 33-6 (2003).

Computation

Digital Elevation Model Based Volume Calculations Using Topographical Data. —M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Graphical Solution for Vertical Curve Computation. — M. Muthusubramanyam; 129(3), 125-6 (2003).

Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. —Joon Heo; 129(4), 151-7 (2003).

Computer aided drafting (CAD)

Graphical Solution for Vertical Curve Computation. — M. Muthusubramanyam; 129(3), 125-6 (2003).

Correlation

Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. —Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).

Correlation Survey for Shaft Deepening in Digwadih Underground Coal Mine. —P. P. Bahuguna; 129(1), 33-6 (2003).

Creep rupture

Formulation of L_1 Norm Minimization in Gauss-Markov Models. — AliReza Amiri-Simkooei; 129(1), 37-43 (2003).

Cross sections

Digital Elevation Model Based Volume Calculations Using Topographical Data. — M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Curvature

Graphical Solution for Vertical Curve Computation. — M. Muthusubramanyam; 129(3), 125-6 (2003).

Data processing

Digital Elevation Model Based Volume Calculations Using Topographical Data. — M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. — Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).

Ionosphere-Free Phase Combinations for Modernized GPS. — Dennis Odijk; 129(4), 165-73 (2003).

Deformation

Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).

Deformation analysis

Monitoring Crustal Movements in West Anatolia by Precision Leveling. —Mualla Yalçınkaya; 129(1), 44-9 (2003).

Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. —Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Digital techniques

Digital Elevation Model Based Volume Calculations Using Topographical Data. —M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Generation of Digital Orthophotos from IKONOS Satellite Images. —Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).

Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. —Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).

Displacement

Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).

Distance measurement

Least-Squares Formula for Zero Error (Z_0) of Electromagnetic Distance Measuring Instruments. —AliReza Amiri-Simkooei; 129(4), 136-40 (2003).

Dynamic models

Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. — Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Earthwork

Estimating Earthwork Volumes of Curved Roadways: Simulation Model. — Said M. Easa; 129(1), 19-27 (2003).

Errors

Effects of Errors in Coordinates on Transformation Parameters. — Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).

Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. — Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).

Least-Squares Formula for Zero Error (Z_0) of Electromagnetic Distance Measuring Instruments. — AliReza Amiri-Simkooei; 129(4), 136-40 (2003).

Idempotence and Orthogonality in Relation to Mixed Model Adjustments. —Joz Wu; 129(4), 141-5 (2003).

Estimation

Variance Component Estimation and Precise GPS Positioning: Case Study. —Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).

Estimating Earthwork Volumes of Curved Roadways: Simulation Model. —Said M. Easa; 129(1), 19-27 (2003).

Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. —Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).

Fiber reinforced polymers

Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).

Frequency

Ionosphere-Free Phase Combinations for Modernized GPS. —Dennis Odijk; 129(4), 165-73 (2003).

Gaussian distribution

Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. —Joon Heo; 129(4), 151-7 (2003).

Geodetic surveys

Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).

Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).

Geographic information systems

Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. —Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).

Variance Component Estimation and Precise GPS Positioning: Case Study. —Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).

Estimating Earthwork Volumes of Curved Roadways: Simulation Model. —Said M. Easa; 129(1), 19-27 (2003).

Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. —Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).

Fiber reinforced polymers

Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).

Frequency

Ionosphere-Free Phase Combinations for Modernized GPS. —Dennis Odijk; 129(4), 165-73 (2003).

Gaussian distribution

Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. —Joon Heo; 129(4), 151-7 (2003).

Geodetic surveys

Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).

Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).

Geographic information systems

Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. —Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).

Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. — Joon Heo; 129(4), 151-7 (2003).
Geographic Information System Data for Supporting Feature Extraction from High-Resolution Aerial and Satellite Images. — Guennadi Guienko and Yerach Doytsher; 129(4), 158-64 (2003).

Geoid

How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? — Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).

Global positioning

How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? — Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).
Variance Component Estimation and Precise GPS Positioning: Case Study. — Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).
Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. —Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).
Effects of Errors in Coordinates on Transformation Parameters. —Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).
Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).
Detection of Wind-Induced Response by Wavelet Transformed GPS Solutions. —Clement Ogaja, Jinling Wang, and Chris Rizos; 129(3), 99-104 (2003).
Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. —Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).
Ionosphere-Free Phase Combinations for Modernized GPS. —Dennis Odijk; 129(4), 165-73 (2003).

Graphic methods

Graphical Solution for Vertical Curve Computation. — M. Muthusubramanyam; 129(3), 125-6 (2003).

Grid systems

Digital Elevation Model Based Volume Calculations Using Topographical Data. —M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Ground motion

Monitoring Crustal Movements in West Anatolia by Precision Leveling. —Mualla Yalçınkaya; 129(1), 44-9 (2003).

Height

How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? —Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).
Determination of Orthometric Height of NJI2 CORS Station. —Joshua Greenfeld and James D. Sens; 129(3), 110-4 (2003).

Highway construction

Estimating Earthwork Volumes of Curved Roadways: Simulation Model. —Said M. Easa; 129(1), 19-27 (2003).
Geometric Modeling Systems for Construction Surveying of Highway Tunnels. — Steve Y. W. Lam and Conrad H. W. Tang; 129(4), 146-50 (2003).

Hydrographs

Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. — Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).

Image analysis

Geographic Information System Data for Supporting Feature Extraction from High-Resolution Aerial and Satellite Images. — Guennadi Guienko and Yerach Doytsher; 129(4), 158-64 (2003).

Imaging techniques

Generation of Digital Orthophotos from IKONOS Satellite Images. — Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).

India

Correlation Survey for Shaft Deepening in Digwadih Underground Coal Mine. — P. P. Bahuguna; 129(1), 33-6 (2003).

Kinematics

Monitoring Crustal Movements in West Anatolia by Precision Leveling. —Mualla Yalçınkaya; 129(1), 44-9 (2003).
Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. —Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Landslides

Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. —Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Least squares method

Study of Earth Tides Using Quartz Tiltmeter. —Bassam Saleh; 129(2), 51-5 (2003).
Efficient Least Squares Coordinate Transformation for an Arbitrary Number of Parameters. —W. C. Hu; 129(2), 65-72 (2003).

Least-squares method

Least-Squares Formula for Zero Error (Z_0) of Electromagnetic Distance Measuring Instruments. —AliReza Amiri-Simkooei; 129(4), 136-40 (2003).

Leveling

How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? —Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).
Monitoring Crustal Movements in West Anatolia by Precision Leveling. —Mualla Yalçınkaya; 129(1), 44-9 (2003).

Linear programming

Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).

Mapping

Generation of Digital Orthophotos from IKONOS Satellite Images. —Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).
Geographic Information System Data for Supporting Feature Extraction from High-Resolution Aerial and Satellite Images. — Guennadi Guienko and Yerach Doytsher; 129(4), 158-64 (2003).

Mathematical models

Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. — Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).
Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. — Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).

Measurement

Formulation of L_1 Norm Minimization in Gauss-Markov Models. — AliReza Amiri-Simkooei; 129(1), 37-43 (2003).
Study of Earth Tides Using Quartz Tiltmeter. — Bassam Saleh; 129(2), 51-5 (2003).
Idempotence and Orthogonality in Relation to Mixed Model Adjustments. — Joz Wu; 129(4), 141-5 (2003).

Methodology

Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).
Least Squares Fitting Method Based on Bivariate Nonuniform *B*-Spline and Its Applications in Surveying Engineering. —Jian-Feng Guo, Qing-Ming Gui, and Yuan-Xi Yang; 129(3), 105-9 (2003).
Determination of Orthometric Height of NJI2 CORS Station. —Joshua Greenfeld and James D. Sens; 129(3), 110-4 (2003).
Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. —Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).

Models

Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).
Digital Elevation Model Based Volume Calculations Using Topographical Data. —M. Yanalak and O. Baykal; 129(2), 56-64 (2003).
Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. —Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).
Idempotence and Orthogonality in Relation to Mixed Model Adjustments. —Joz Wu; 129(4), 141-5 (2003).
Geometric Modeling Systems for Construction Surveying of Highway Tunnels. —Steve Y. W. Lam and Conrad H. W. Tang; 129(4), 146-50 (2003).

Monitoring

Detection of Wind-Induced Response by Wavelet Transformed GPS Solutions. —Clement Ogaja, Jinling Wang, and Chris Rizos; 129(3), 99-104 (2003).
Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. —Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Orthophotos
Generation of Digital Orthophotos from IKONOS Satellite Images. — Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).
Parameters
Efficient Least Squares Coordinate Transformation for an Arbitrary Number of Parameters. — W. C. Hu; 129(2), 65-72 (2003).
Relaxation, mechanics
Formulation of L_1 Norm Minimization in Gauss-Markov Models. — AliReza Amiri-Simkooei; 129(1), 37-43 (2003).
Satellites
Generation of Digital Orthophotos from IKONOS Satellite Images. — Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).
Shafts
Correlation Survey for Shaft Deepening in Digwadih Underground Coal Mine. — P. P. Bahuguna; 129(1), 33-6 (2003).
Simulation
Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. — Joon Heo; 129(4), 151-7 (2003).
Simulation models
Estimating Earthwork Volumes of Curved Roadways: Simulation Model. — Said M. Easa; 129(1), 19-27 (2003).
Simulations
Least Squares Fitting Method Based on Bivariate Nonuniform *B*-Spline and Its Applications in Surveying Engineering. — Jian-Feng Guo, Qing-Ming Gui, and Yuan-Xi Yang; 129(3), 105-9 (2003).
Strain
Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).
Surveys
Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. — Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).
Efficient Least Squares Coordinate Transformation for an Arbitrary Number of Parameters. — W. C. Hu; 129(2), 65-72 (2003).
Least Squares Fitting Method Based on Bivariate Nonuniform *B*-Spline and Its Applications in Surveying Engineering. — Jian-Feng Guo, Qing-Ming Gui, and Yuan-Xi Yang; 129(3), 105-9 (2003).
Determination of Orthometric Height of NJI2 CORS Station. — Joshua Greenfeld and James D. Sens; 129(3), 110-4 (2003).
Geometric Modeling Systems for Construction Surveying of Highway Tunnels. — Steve Y. W. Lam and Conrad H. W. Tang; 129(4), 146-50 (2003).
Tendons
Formulation of L_1 Norm Minimization in Gauss-Markov Models. — AliReza Amiri-Simkooei; 129(1), 37-43 (2003).
Terrain
Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. — Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).
Tides
Study of Earth Tides Using Quartz Tiltmeter. — Bassam Saleh; 129(2), 51-5 (2003).
Tiltmeters
Study of Earth Tides Using Quartz Tiltmeter. — Bassam Saleh; 129(2), 51-5 (2003).
Topographic surveys
Generation of Digital Orthophotos from IKONOS Satellite Images. — Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).
Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. — Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).
Topography
Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. — Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).
Transformations
Efficient Least Squares Coordinate Transformation for an Arbitrary Number of Parameters. — W. C. Hu; 129(2), 65-72 (2003).
Effects of Errors in Coordinates on Transformation Parameters. — Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).
Triangulation
Digital Elevation Model Based Volume Calculations Using Topographical Data. — M. Yanalak and O. Baykal; 129(2), 56-64 (2003).
Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. — Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).
Tunnels
Geometric Modeling Systems for Construction Surveying of Highway Tunnels. — Steve Y. W. Lam and Conrad H. W. Tang; 129(4), 146-50 (2003).
Turkey
Monitoring Crustal Movements in West Anatolia by Precision Leveling. — Mualla Yalçınkaya; 129(1), 44-9 (2003).
Effects of Errors in Coordinates on Transformation Parameters. — Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).
Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. — Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).
Uncertainty
Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. — Joon Heo; 129(4), 151-7 (2003).
Variance analysis
Variance Component Estimation and Precise GPS Positioning: Case Study. — Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).
Volume measurement
Estimating Earthwork Volumes of Curved Roadways: Simulation Model. — Said M. Easa; 129(1), 19-27 (2003).
Digital Elevation Model Based Volume Calculations Using Topographical Da.a. — M. Yanalak and O. Baykal; 129(2), 56-64 (2003).
Wind forces
Detection of Wind-Induced Response by Wavelet Transformed GPS Solutions. — Clement Ogaja, Jinling Wang, and Chris Rizos; 129(3), 99-104 (2003).

Author Index

Akcin, Hakan
Effects of Errors in Coordinates on Transformation Parameters. —Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).

Amiri-Simkooei, AliReza
Formulation of L_1 Norm Minimization in Gauss-Markov Models. —AliReza Amiri-Simkooei; 129(1), 37-43 (2003).
Least-Squares Formula for Zero Error (Z_0) of Electromagnetic Distance Measuring Instruments. —AliReza Amiri-Simkooei; 129(4), 136-40 (2003).

Bahuguna, P. P.
Correlation Survey for Shaft Deepening in Digwadih Underground Coal Mine. —P. P. Bahuguna; 129(1), 33-6 (2003).

Baykal, O.
Digital Elevation Model Based Volume Calculations Using Topographical Data. —M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Bayrak, Temel
Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. —Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Brouns, Gert
Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. —Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).

Chen, Liang-Chien
Generation of Digital Orthophotos from IKONOS Satellite Images. —Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).

Constales, Denis
Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. —Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).

Deniz, Rasim
Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).

Denli, H. Hakan
Global Congruency Test Methods for GPS Networks. — H. Hakan Denli and Rasim Deniz; 129(3), 95-8 (2003).

De Wulf , Alain
Delaunay Triangulation Algorithms Useful for Multibeam Echosounding. —Gert Brouns, Alain De Wulf , and Denis Constales; 129(2), 79-84 (2003).

Doytsher, Yerach
Geographic Information System Data for Supporting Feature Extraction from High-Resolution Aerial and Satellite Images. —Guennadi Guienko and Yerach Doytsher; 129(4), 158-64 (2003).

Easa, Said M.
Estimating Earthwork Volumes of Curved Roadways: Simulation Model. — Said M. Easa; 129(1), 19-27 (2003).

El-Rabbany, Ahmed
Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. —Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).

Fotopoulos, Georgia
How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? — Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).

Greenfeld, Joshua
Determination of Orthometric Height of NJI2 CORS Station. — Joshua Greenfeld and James D. Sens; 129(3), 110-4 (2003).

Gui, Qing-Ming
Least Squares Fitting Method Based on Bivariate Nonuniform *B*-Spline and Its Applications in Surveying Engineering. —Jian-Feng Guo, Qing-Ming Gui, and Yuan-Xi Yang; 129(3), 105-9 (2003).

Guienko, Guennadi
Geographic Information System Data for Supporting Feature Extraction from High-Resolution Aerial and Satellite Images. —Guennadi Guienko and Yerach Doytsher; 129(4), 158-64 (2003).

Guo, Jian-Feng
Least Squares Fitting Method Based on Bivariate Nonuniform *B*-Spline and Its Applications in Surveying Engineering. —Jian-Feng Guo, Qing-Ming Gui, and Yuan-Xi Yang; 129(3), 105-9 (2003).

Heo, Joon
Steepest Descent Method for Representing Spatially Correlated Uncertainty in GIS. —Joon Heo; 129(4), 151-7 (2003).

Hu, W. C.
Efficient Least Squares Coordinate Transformation for an Arbitrary Number of Parameters. —W. C. Hu; 129(2), 65-72 (2003).

Hussain, Ejaz
Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. —Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).

Kenselaar, Frank
Variance Component Estimation and Precise GPS Positioning: Case Study. —Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).

Kleusberg, Alfred
Effect of Temporal Physical Correlation on Accuracy Estimation in GPS Relative Positioning. —Ahmed El-Rabbany and Alfred Kleusberg; 129(1), 28-32 (2003).

Kotsakis, Christopher
How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? — Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).

Kutoglu, Hakan S.
Effects of Errors in Coordinates on Transformation Parameters. — Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).

Lam, Steve Y. W.
Geometric Modeling Systems for Construction Surveying of Highway Tunnels. — Steve Y. W. Lam and Conrad H. W. Tang; 129(4), 146-50 (2003).

Lo, Chiu-Yueh
Generation of Digital Orthophotos from IKONOS Satellite Images. — Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).

Mekik, Cetin
Effects of Errors in Coordinates on Transformation Parameters. — Hakan S. Kutoglu, Cetin Mekik, and Hakan Akcin; 129(3), 91-4 (2003).

Muthusubramanyam, M.
Graphical Solution for Vertical Curve Computation. — M. Muthusubramanyam; 129(3), 125-6 (2003).

Nalinaa, K.
Discussion of "Analytical Solution for the Amplitude Ratio Method for Determining Mean High Water in Tidal Regions" by Joshua Greenfeld. —S. Rajasekaran and K. Nalinaa; 129(3), 127-8 (2003).

Odijk, Dennis
Ionosphere-Free Phase Combinations for Modernized GPS. —Dennis Odijk; 129(4), 165-73 (2003).

Ogaja, Clement
Detection of Wind-Induced Response by Wavelet Transformed GPS Solutions. —Clement Ogaja, Jinling Wang, and Chris Rizos; 129(3), 99-104 (2003).

Rajasekaran, S.
Discussion of "Analytical Solution for the Amplitude Ratio Method for Determining Mean High Water in Tidal Regions" by Joshua Greenfeld. —S. Rajasekaran and K. Nalinaa; 129(3), 127-8 (2003).

Rau, Jiann-Yeou
Generation of Digital Orthophotos from IKONOS Satellite Images. —Liang-Chien Chen, Chiu-Yueh Lo, and Jiann-Yeou Rau; 129(2), 73-8 (2003).

Rizos, Chris
Detection of Wind-Induced Response by Wavelet Transformed GPS Solutions. —Clement Ogaja, Jinling Wang, and Chris Rizos; 129(3), 99-104 (2003).
Comparing Different Global Positioning System Data Processing Techniques for Modeling Re-

sidual Systematic Errors. — Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).

Saleh, Bassam

Study of Earth Tides Using Quartz Tiltmeter. — Bassam Saleh; 129(2), 51-5 (2003).

Satirapod, Chalermchon

Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. — Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).

Sens, James D.

Determination of Orthometric Height of NJI2 CORS Station. — Joshua Greenfeld and James D. Sens; 129(3), 110-4 (2003).

Shan, Jie

Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. — Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).

Sideris, Michael G.

How Accurately Can We Determine Orthometric Height Differences from GPS and Geoid Data? — Georgia Fotopoulos, Christopher Kotsakis, and Michael G. Sideris; 129(1), 1-10 (2003).

Tang, Conrad H. W.

Geometric Modeling Systems for Construction Surveying of Highway Tunnels. — Steve Y. W. Lam and Conrad H. W. Tang; 129(4), 146-50 (2003).

Tiberius, Christian

Variance Component Estimation and Precise GPS Positioning: Case Study. — Christian Tiberius and Frank Kenselaar; 129(1), 11-8 (2003).

Wang, Jinling

Detection of Wind-Induced Response by Wavelet Transformed GPS Solutions. — Clement Ogaja, Jinling Wang, and Chris Rizos; 129(3), 99-104 (2003).

Comparing Different Global Positioning System Data Processing Techniques for Modeling Residual Systematic Errors. — Chalermchon Satirapod, Jinling Wang, and Chris Rizos; 129(4), 129-35 (2003).

Wu, Joz

Idempotence and Orthogonality in Relation to Mixed Model Adjustments. — Joz Wu; 129(4), 141-5 (2003).

Yalçınkaya, Mualla

Monitoring Crustal Movements in West Anatolia by Precision Leveling. — Mualla Yalçınkaya; 129(1), 44-9 (2003).

Dynamic Model for Monitoring Landslides with Emphasis on Underground Water in Trabzon Province, Northeastern Turkey. — Mualla Yalçınkaya and Temel Bayrak; 129(3), 115-24 (2003).

Yanalak, M.

Digital Elevation Model Based Volume Calculations Using Topographical Data. — M. Yanalak and O. Baykal; 129(2), 56-64 (2003).

Yang, Yuan-Xi

Least Squares Fitting Method Based on Bivariate Nonuniform *B*-Spline and Its Applications in Surveying Engineering. — Jian-Feng Guo, Qing-Ming Gui, and Yuan-Xi Yang; 129(3), 105-9 (2003).

Zaheer, Muhammad

Study on Accuracy of 1-Degree DEM Versus Topographic Complexity Using GIS Zonal Analysis. — Jie Shan, Muhammad Zaheer, and Ejaz Hussain; 129(2), 85-9 (2003).
